

# KEMCO CASE STUDY

## Concrete - Ready Mix Industry

### Direct Contact Water Heater

A large ready mix operation had to run their boiler all night and stored hot water at 200°F so that they could batch for longer periods of time before the water temperature dropped below 140°F. With the KEMCO Direct Contact Water Heater, start up is now 30 minutes prior to batching to 225 yards per hour after hour at 180°F. This convenience is in addition to the 99.7% unit efficiency this customer is “thoroughly pleased with the performance of the KEMCO heater and are astonished with the fuel savings that we are seeing.”

### Other Industry Comments

**“The KEMCO heater never runs out of water, and it’s the best.** It runs great all winter, With my old system, even a 10,000 gallon tank would not keep up, but my KEMCO does.”

**“The KEMCO water heater does a fantastic job and has a fast recovery.** There is no trouble with heat. Efficiency on heating cost saved us money!”

**“The KEMCO system is so efficient and fast,** we don’t need to run it all weekend like we did our other system. With our KEMCO, the performance exceeded the promise.”
